

Dr. Massimo D'archivio

- Researcher at Istituto Superiore di Sanità (ISS), Rome, Italy, at the Department of Veterinary Public Health and Food Safety (2008-to date).

Main Interests:

- The role of dietary and oxidized lipids in the pathogenesis of chronic-degenerative diseases, such as cardiovascular disease, type 2 diabetes, and obesity as well as the protective effects exerted by dietary polyphenols, especially those occurring in extra virgin olive oil.
- The molecular mechanisms of action of polyphenols by studying their effects on intracellular signalling and gene expression.

Presentation during the Conference:

Bioavailability of Polyphenols: status and controversies
